THE PROPER CARE OF YOUR AUTOMOBILE

Selecting the Right Polish

IN the first article it was told how many motorists make the mistake of believing that their cars must be re-finished when the finish becomes dull and faded. In restoring the color and gloss of the finish, however, it is important that the right polishing material be selected. There is little advantage, for instance, in using an oily polish, because it doesn't remove the traffic film, but only forms an oil film over it.

The best results are obtained by the use of a polish which contains a mild solvent to soften the traffic film, and a light abrasive to clear

away the chalked pigment and dirt.

When they start cleaning their cars, many people become alarmed when they see color coming away on the cloth. They assume that the polish is too severe, and will wear away the finish on the car. But there is nothing to fear when the properly formulated polish is used. The color on the cloth simply indicates that the tiny particles of pigment, loosened by the weathering, are being removed with the traffic film. This chalked pigment and accumulation of dirt and grease must be removed to uncover the hard live lacquer beneath.

THE NEWS OF STONY PLAIN AND DISTRICT.

Mr M Watt, of Westlock, is at present assisting Mr Hy Landsman at the Searle elevator.

Miss Robertson of Edmonton, was a week-end guest of Miss Malloch.

Muir Lake Community held a very enjoyable dance in the Hall, Friday evening.

Some miscreant pitched a beer bottle thru Baker Trapp's window early Saturday morning. To add insult to injury, the bottle was empty when found.

Wm. Kelly, general merchant, is planning to renew last season's grain deal with farmers—taking their wheat in exchange for flour.

The favorite indoor sport of the elevatorman at present is installing his "moisture test, or," a contrivance which had been out of use for several seasons.

The last affair of the season, a "Farwell" dance, took place at Barrie's Beach Sat. evening.

There is a rumor to the effect that another change will shortly be made in the running time of the mail trains on this division. The train to the East is expected to operate about 3 hours later, going thru here at approximately 8 a.m. instead of 4:51, as at present.

BUTTER AND EGGS WANTED at The Royal Cafe.

Tennis Club Dance.

The reception and dance of the Stony Plain Tennis club, held on Friday night, proved to be a very charming affair, the members and their friends turning out in full force; their numbers being augmented by tennis players from the City. All succeeded in having a gay time, dancing to the excellent music provided by the Barths. The new addition to the hall was not ready for use, but this will be remedied when the club next holds its social evening.

Tom Keene on Thurs. Evg.

That there will be lots of excitement this Thurs. Evg. at Kelly's hall when this week's film is put on goes without saying. The attraction Mr Goodman has secured is entitled "Partners," with the well known Tom Keene, son of Western Whirlwinds, in the leading part. With Keene there will be a picturesque group of supporters in true Western garb, sufficient to make this film one to be remembered. The accompanying comic will introduce those two noisy mirth-makers, Lora & Hardy.

Last Thursday's film, "When Ladies Meet" attracted the usual good crowd of movie fans, who were well pleased with the picture. The audience got a big kick out of the first film shown, "Men Only Wanted," a picture which gave an insight of the working of a matrimonial bureau, and the ludicrous situations which follow when the patrons meet.

"Fresh from the Gardens"

Russia And The League Of Nations

Soviet Russia having applied for admission into the League of Nations, the burning topic at Geneva and in many of the European capitals is whether that application should be approved or rejected. Russia has the powerful support of Great Britain, France and Italy as well as of some other countries, but is opposed by a number of the smaller nations, including, so it is reported, Belgium, Poland and Greece. While Switzerland, the home of the League, is said to be sharply divided on the question. The London Times has expressed the belief that Canada and Ireland will line up with the opposition.

Unless unanimity can be reached through advance negotiations and conferences, the forthcoming meeting of the General Assembly of the League will be the scene of an animated, possibly bitter, debate, with the further possibility of the failure of Russia's application because an unanimous decision cannot be reached. It looks like a knotty problem to solve, yet most people in this country would be inclined to regard it as a very simple one.

It is not necessary to reach the reason which led to the establishment of the League of Nations, nor to set forth its aims and objectives. Its very name implies that it was the intention of the founders that it should include not some nations, but all nations. As long as certain nations remain outside its membership, the League is not as strong as it should be. It is weakened by the absence of even one nation. In the past one of its great weaknesses has resulted from the refusal of the United States to join, plus Russia's absence, and the really striking that barred Germany. Now that Russia is willing to come in, why refuse to permit it?

The only answer forthcoming is that the Government of Russia is Communist. Premier Tsaldaris of Greece is reported as saying that he will vote against Russia's election to membership on the ground that it would sanction international Communism. This may be offered as an excuse, but surely it is not a valid and legitimate reason for exclusion.

Italy is a member of the League, but that does not constitute sanction of international Communism by the other nations of the world. Other nations may set up or bow to dictatorships or other forms of autocratic government, and some might turn socialist, others become more and more democratic, and others again return to absolute monarchies. Such developments are the right and privilege of the people of the nations concerned, but they do not constitute reasons why they should be treated as outlaws among the nations of the world.

The people of any country have the sole right to determine their own form of government, that which in their opinion is best suited to their particular conditions or state of development. This is one of the fundamental principles underlying the structure of the League of Nations, namely, self-determination of peoples and nations. Failure to recognize it, and give effect to it, would quickly destroy the usefulness of the League and ultimately destroy the League itself as an organization.

There are three ways, following internal upheavals and revolutions, a nation may lose the diplomatic recognition of other nations, but this is largely because the fact is not clearly established as to which of the contending groups really enjoy the support of the people in such country and can therefore be safely recognized as "the Government". But when a Government once becomes established, recognition of it by other nations as a rule quickly follows. The means by which it came into being, its principles and policies are a matter for its own people to approve or disapprove, and recognition by other nations does not necessarily imply approval.

The Union of Socialist Soviet Republics (Russia) has an established form of government; has had for years. It is recognized by most of the other nations. Agreeably or otherwise, it is accepted by the Russian people. What reason is there, then, why Russia should not be recognized by the nations acting jointly through the League of Nations and full membership in that body be granted to it? It is silly to argue that the granting of such membership in the League is to sanction international Communism. One might as well argue that to now admit the United States would be to give international sanction to all the policies and implications of Roosevelt's "New Deal", or in the case of Germany to place the stamp of approval on Hitler and his Nazi policies and programme.

Regardless of what one may think of Russian Socialism and the policies and methods of the Soviet Government, and quite opposed as one may be to the introduction of similar policies and methods into their own country, people the world over should wish Russia well. It is far better for the world that Russia should succeed and not fail in its experiment, and certainly it would be unchristian and cruel towards the Russian people to desire failure. Even though the Russian system may not be desired nor prove beneficial elsewhere, it may suit Russia in its present state of development.

The best way to promote international understanding and goodwill, and thus promote the cause of peace, is for the nations to get together—the closer the better. And the best way yet devised for such getting-together is in the General Assembly of the League of Nations. Therefore, let every nation in who is willing to join, and do everything possible to bring in those which presently are averse to joining.

Amblyopia is a name given to diminished acuteness of vision not relieved by the use of glasses and in many cases not accompanied by any visible ocular changes.

The oldest altars of the Babylonians which have been excavated are square heaps of sun-dried bricks. Herodotus relates that their great altars were made of gold.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weakened system, making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years—you do not experiment when you use it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Famed Racing Husky Dead

St. Godard Mourns Loss Of Nine-Years-Old Team Leader

Emil St. Godard, world champion dog racer, mourns the death of his gallant leader Toby, one of the greatest dogs that ever stepped in harness.

Toby died at Teterborough, New Hampshire. The veteran of races across the continent suddenly suffered stomach trouble, and although three doctors worked on him they failed to save his life.

Toby was nine years old. He was part husky and part greyhound, a combination of staying power and speed. He was raised in the St. Godard kennels and won 28 long distance classics.

Toby led the St. Godard string in six of the gruelling 200-mile derbies between The Pas and Flin Flon. He was also well known to sportsmen in Ottawa, Quebec and New Hampshire.

It's tough all right," said Emil, when friends heard the news. "Toby was a wonderful dog. I intended to leave him in August to start training again in New Hampshire. I will have to train a new lead. I have several of Toby's pups at the ranch and expect to work one of them in Toby's place."

DOCTOR SAID SHE MUST REDUCE

Fat a Danger to Her Heart

Overweight is not merely a matter of appearance—it affects health, too. Excess fat robs the system of energy—the internal organs grow lax and slow down under the burden—and undue strain is put on the heart, here is an instance. A woman writes:

"I have been treated by specialists, who tried to reduce my weight, as I suffered with heart attacks. But no matter what they gave me, nothing would reduce me. Since taking Kruschen, everyone wherever I go exclaims about how much flesh I have lost. I took it at first for rheumatism, and it has done me a world of good, as well as greatly reducing my weight. Before Christmas I weighed 224 lbs. Now I am considerably less—in fact, a coat I had worn last year I have had to take to be altered. Before I was able to wear it again. I have not really made any difference with my diet, so there is only Kruschen to thank!" (Mrs.) M. S.

The six salts in Kruschen assist the internal organs to throw off each day the wastage and poisons that encumber the system. Then, little by little, that ugly fat goes—slowly, yes—but surely.

Alberta In The Lead

Province Has Highest Marriage Rate In Canada

A bridegroom of 84 with a bride of 18; 10 brides under 16; three mothers who have borne their third child when but 16 years old; two men who married when they were more than 80 years old are some of the highlights of a report compiled from the vital statistics records of Alberta. The province has the highest marriage rate in the Dominion and the highest birthrate west of Quebec.

Englishmen are still the greatest progenitors, followed by Ukrainians and Germans. Alberta does not follow the majority, for November proved the popular month in which to be married.

Alberta boys apparently do not care to assume marital duties as readily as do the girls, for while there were only 76 grooms under the age of 21, no less than 1,416 girls of a total of 5,684 became brides before they reached their majority.

Blind Man Climbs Mountain

Portland Publisher Aided By Dog Makes Long Ascent

Although he is totally blind, Ed G. Robbins, publisher of a Portland weekly newspaper, has realized his long ambition of climbing the snow-capped summit of Mt. Hood. He was aided by his faithful police dog, "Treble", in making the long ascent.

Asked what he wanted to climb the peaks for, the blind editor said: "For the experience, man, for the experience!"

Scotland is testing the innovation of sending life lines by rockets shot from ship to shore instead of the other way around.

Japan Grows Own Wheat

Country Now Able To Supply Its Own Requirements

The Japanese Government's five-year wheat growing project, inaugurated in 1932 by the ministry of agriculture and forestry to enable the country to supply its own requirements of the cereal, has achieved its objective two years ahead of time.

Estimates submitted at a conference in Tokyo of the chief officials of the wheat encouragement bureau in the various prefectures showed the wheat crop in Japan this year will yield 44,849,900 bushels, while the estimated consumption of the country is 45,000,000 bushels.

Since the domestic crop is now practically equal to consumption, the officials have decided to relax their efforts to increase production and to concentrate their attention on effecting improvement in quality.

Although bread by no means supplants rice, which remains the staple cereal, it has been popular as a food for several years and army regulations prescribe mixing wheat with rice before boiling it for soldiers' rations. The wheat constituents counteract the tendency of polished rice alone to cause beriberi (kakke as it is called in Japanese).

Many households consequently now mix some wheat with the rice before boiling it for the family table with resultant good effects on the general health.

Due to the world rise in wheat prices, Japanese flour mills have been falling back recently chiefly on domestic wheat. It is likely that the mills will continue to import a fair quantity of Canadian and Australian wheat of qualities not yet produced there, for mixing purposes, for some time at least.

The Art Of Making Tea

Method To Use In Order To Obtain The Full Delicious Flavor

No beverage in the world is as universally popular as tea. It is used in nearly every civilized country and this delightful drink not only refreshes and invigorates the mind and body, but also serves as the medium by which people meet in a spirit of friendship and understanding the world over.

If the following directions (which were supplied by "Salada" Tea) are followed, each cup will yield the full delicious flavour that makes tea so enjoyable.

1. Use a tea of fine quality.
 2. Use fresh water always.
 3. Use an earthenware tea-pot.
- Scald out the pot to make it warm, place in it a level teaspoon of tea for every cup desired, and one for the pot. Add fresh boiling water. Allow to steep about five minutes and stir slightly before serving.

Tea made according to the above rules will be fragrant, delicious and completely satisfying.

Is Densely Populated

The most densely populated small area in the world is 112th street between First and Second avenues, New York, Miss Marguerite Wales, social worker, said. The block is only 700 feet long, but 2,700 people make it their home. Seventy per cent. of them, Miss Wales said, are on relief.

If you talk of a bridge expert you may mean a dentist, an engineer or a card player.

Britain's Best Customers

Annual Purchases Of Railways Run Into Millions Of Pounds

This distinction belongs to British railways, whose annual purchases include 50,000 different articles. Over 1,000 miles of track are laid or renewed yearly, for which 210,000 tons of steel rails, 4,000,000 sleepers, and 2,000,000 cubic yards of ballast must be bought. The 14,000,000 tons of coal consumed by 21,000 locomotives, and steamships and hotels keep a large section of the mining industry regularly employed; 3,800,000 yards of cloth are purchased from British mills for uniforms, 21,000,000 bricks, 62,000 tons of oil, 9,000 tons of paint and varnish, and a further 296,000 tons of iron and steel—all from British firms.

The sum of £16,800,000 is expended on the renewal and maintenance of permanent way and works, and £19,900,000 on locomotives, carriages and wagons.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel

You are "feeling punk" simply because your liver isn't pouring its daily two ounces of liquid bile into your bowels. Digestion and elimination are both hampered, and your entire system being poisoned.

Get your liver a liver stimulant. Something that goes farther than salts, mineral water, oil, laxative candy or chewing gum or roughage which only move the bowels—ignoring the real cause of trouble, your liver.

Take Carter's Little Liver Pills. Fully guaranteed. No harmful solvent (mercury), safe, sure. Ask for them by name. Refuse substitutes. See all druggists.

Floating Factory Designed To Produce Electric Power By Use Of Warm And Cold Sea Water

A unique floating factory designed to make tropical sea water produce cheap ice where it is most needed steamed out of Dunkirk harbor recently for its first test.

The experiment is to be conducted at Rio de Janeiro and it is there the ice's inventor, George Claude, 64-year-old Frenchman, awaits her. A few hours behind the ice ship sailed the SS. Mycon, carrying a tube which, when fitted together, is one-half mile long, part of the ice-making equipment.

The ice ship is the 10,000-ton steamer, Tunisia, outfitted with a fantastic plant for producing electric power by the action of warm and cold water drawn from different levels of the sea.

This free power inventor intends to produce 1,000 tons of ice a day to cool the drinks and preserve the food of sweating South Americans. It looks like a profitable enterprise, to M. Claude, whose capital investment is estimated at less than \$500,000.

On the deck of the floating ice factory are immense reservoirs and a complex system of pipes, turbines and refrigerating units and to supply these with the requisite sea water of differing temperatures is a sheet-iron tube a half-mile (700 metres of 2,296 feet) in length and 2.5 metres (eight feet) in diameter.

M. Claude's new venture, with which he thinks Jules Verne would have been delighted, is the fruit of experiments at Ougree, Belgium, in 1928 and off the coast of Cuba in 1931 in which he used a similar tube to test his theory that man can harness forces in warm and cold currents of the same sea.

The process, briefly, consists of making warm water from the surface of tropical seas boil by introducing it into a vacuum, utilizing the vapor to run turbines, and then condensing it with cold water drawn from the depths.

When the Tunisia reaches Rio de Janeiro, or some other point near the Brazilian coast, it will drop its long tube overboard, with an anchor to hold one end near sea bottom and a huge special float, nine metres (29½ feet) in diameter, to keep the other end above sea level. The Tunisia then will tie up to the buoy, connect its shipboard apparatus to the submerged pipe and commence, Claude hopes, its ice production.

Cannot Remove Noise

Engineers Will Have To Put Up With Locomotive Whistle

In a 2,000 word judgment, the board of railway commissioners for Canada decided that railway engineers will just have to sit there and take it. If the locomotive whistle rings in their ears, it's too bad, but the board can do nothing about it.

It all started when the Brotherhood of Locomotive Firemen and Enginemen asked the board to order railways to place whistles "where the sounds therefrom will not be injurious to the ears of the engineers." The board heard many witnesses, instructed its men to ride in locomotives to test whistles with their own ears, investigated types of whistles and measured different engines.

The Solomon-like judgment was then rendered. It ended with these words: "It does not appear that anything can be done, unless the railways find they can move the whistle forward and increase the distance between it and the cab windows."

Hordes Of Dragonflies

Children had to rush for shelter when hordes of dragonflies descended on the seaside town of Bornholm, Denmark. Millions of the insects darkened the sky for several hours. They flew in people's faces and made walking impossible.

"So you want a job as proof reader?"

"Yes, sir."

"And do you understand your responsibility?"

"Yes, sir, when you make a mistake, I take all of the blame."

How It Originated

Two Explanations As To Source Of Term "Grass Widow"

The term "grass widow" is said to have originated among the Anglo-Indians about the middle of the Nineteenth Century from the practice of European husbands residing in India sending their wives and children to the hills during the hot season. In this section the grass is plentiful.

A more plausible suggestion is that it arose in America during the gold rush in California; a man not infrequently put his wife and children out to board, while he went to the diggings. This he called "putting his wife to grass."

449

YOUTHFUL AND CHARMING—

Spotless white silk to add gaiety to your wardrobe.

Fashion centres much interest in spots—particularly light navy blue spots on white ground for spectator sports and town-wear.

It is tubular silk, that is so easily washed and ironed. The shirtwaist collar is finished with a dainty self-fabric frill, with pick-edge (done professionally). The edge of the sleeve is rolled by hand. And isn't the rest of the frock simple enough to make?

You may also choose from the delicate ice-cream pastel tub silks, two-toned stripes, lines, checked near-sucker, shirting silks, etc.

It's also stunning in black satin with the belt fastened with rhinestone buckle with the collar frill of tucked white net.

Style No. 449 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3½ yards of 36-inch material with ½ yard of 38-inch contrasting.

Price of patterns 10 cents in stamps or coin (coins preferred). Wrap coin carefully.

Houses Of The Future

Will Be Vastly Different From The Kind We Know

What will the homes of the future be like? asks a writer in the Birmingham Weekly Post.

Already in place of brick and stone walls it is possible to have hollow walls of metal-sustaining composition, forming rooms like vacuum flasks that can be kept at a steady temperature night and day. They can also be lined with soundproof materials, so that one can read or study in happy ignorance of what is going on in other parts of the house.

Whether this is an advantage, of course, is a matter of opinion. Another sort of house already in the realms of possibility is one of tinted or clear toughened glass. The great advantage of this is that its walls can be saturated with sunshine.

At the Building Research Station at Watford, England, a house is being erected that, if successful, will be impervious to all climatic conditions. One or two rooms are being formed inside a shell. Here all sorts of "weathers" are reproduced, so that requirements for combating excessive damp, heat and cold can be thoroughly tested.

It is not only in structure, however, that the houses of the future promise to come near to perfection. Life inside them should be a luxurious, not to say exciting, affair. Professor A. M. Low, the inventor, has fitted his own home with a marvellous array of labor-saving gadgets. Among them is a device for making the garage doors open at the sound of the professor's motor horn. A robot alarm clock five minutes before going off lights a spirit lamp for the morning tea; and there is an arrangement by which fires anywhere in the house will light themselves at a fixed time. But perhaps the most useful device of all is an indicator that shows when callers are coming up the garden path. Connected with it is another gadget for stopping the bell ringing if these callers are undesired.

No doubt at the present time a certain amount of risk attaches to such inventions. The professor was once testing a new geyser that was supposed to have enormous powers. It had simultaneously ejected itself out of the window and the professor out of the door.

Tomb Fifty Centuries Old

What is described as a "beautifully-painted tomb nearly fifty centuries old" has been discovered by Professor Selim Hassan near the Pyramids. The tomb belonged to Tlasen, presumably a member of the Council of Ten comprising the executive of the then Egyptian Government. The paintings, depicting high personages, birds and flowers, are in colors so fresh that they look nearly new.

British Professor Shows That Tree Cultivation Is Best Means Of Conserving Moisture Supply

A Necessary Precaution

Apples Need To Be Thoroughly Washed Before Eating

Health authorities are warning those trying to keep the doctor away by eating an apple a day that the doctor's services may be needed if the apple is not properly cleaned before eating. It is not sufficient to follow the time-honored schoolboy practice of giving the apple a scrub on the shirt sleeve.

All this comes about through a combination of circumstances. In these latter years the only good apples come from trees whose foliage has been sprayed with poison. In ordinary seasons most of this spraying is completed early and a normal rainfall probably has a part in washing away the residue of poison before the fruit ripens.

This year spraying was the more necessary because the drouth encountered insect pests, and of course in a drouth little rain washes the apples. So far no case of sickness or death has been ascribed to poisoning from eating fruit. It would be foolish to abandon the apple-eating practice from fear of spray poisoning.

But it is well enough to take the health authorities' advice and give the apple a bath. It is a wholesome practice anyway.

A Flourishing Industry

Bones Go Through Many Stages To Produce By-Products

The millions of bones that are thrown away every year help to make a flourishing industry. Their by-products and uses are practically endless, and there is no waste. Bones go through many stages. First they are boiled until all the fat is extracted; this is made into glycerine and certain types of lubricants. Skin and marrow bones are used for making handles. The rest are ground into fine powder in vast mills and have an infinite number of uses. A certain amount of this powder is used to make bone-manure and bone-meal for farmers. It is extremely valuable. Sugar, salt, and other refineries utilize bones in some of their refining processes. Bones are also used for case-hardening cast steel. The worst part of old bones is their powerful and penetrating odour, which, strange to say, is not in the least harmful. Asthmatics and those suffering with lung trouble often find relief when working in such an atmosphere.

Highly complex and delicately balanced, the associated flora and fauna of the forest has an abundance of material on which much of the prosperity of a nation depends, declared Prof. A. W. Borthwick, president of the botany section of the British association, at the annual meeting in Scotland.

Professor Borthwick said the destruction of forests was increasing at a rate which gave serious apprehension as to their ability to withstand increasing and unscientific exploitation.

The professor gave the opinion the main trouble was that in the past the woods had not been managed with a view to natural regeneration; under light increment treatment, the more open canopy and crown room enables the trees to respond almost immediately to the influence of the seed falling.

Although it had not been decided whether forests increase rainfall, it could be claimed the forest is of great importance as a conservator of water and as an equalizer in the drainage of the land.

"Where no forests exist in the upland or collecting regions of water-sheds, the rain falls unchecked, beating the surface hard or eroding it down to the bare rock," he pointed out. "There is nothing to check the downward rush of water, which collects into mountain torrents which rush unchecked into the main rivers and streams, causing them to become swollen and flooded. The damage done by severe and sudden floods to roads, bridges, agricultural crops and stock, including human habitation, is well-nigh incalculable."

Where forest existed in the upland districts or collecting ground of the water, rivers were more uniform in their flow, year in and year out, and carried much less silt and debris.

Rain broken by the tree crowns percolated more slowly into the soil and found its way into springs and watercourses. Further the influence of the forest was that the melting of the snow was more gradual, the water being absorbed and stored and floods avoided. The forest regulated the off-flow of water after heavy rains.

Demand For Vegetables

People Eating More And Output Has Greatly Increased

Government reports tell of the increased output of vegetables in the past half century. Home gardens are given more attention and highly specialized vegetable farms have been developed near the centres of population. Shop windows offer many kinds of vegetables from plain cabbage to the bright hued peppers. The housewife has become vegetable minded and it also has no garden of her own she purchases freely and regularly the sorts that are in season.

At the meeting of vegetable growers in Toronto recently one of the speakers from Washington, D.C., made a comparison of the menu for an English banquet of sixty years ago and one prepared at a New York hotel a year ago for home economists. The earlier bill of fare started with thick soup and listed fish and four kinds of meat, followed by substantial pudding and rounded off with Siltion cheese. Whatever vegetables were used were in quantities too small to be worth mentioning. The modern banquet, planned with a view to economy and health had decorative effect radishes, green olives and celery hearts. There was soup with a Russian name but entirely vegetable in its composition. The main course was roast fowl with green peas and a pineapple salad. Strawberries and ice cream made the final course of this substantial meal which was planned to give a proper balance between meat and vegetables.

Just As Easy

"Mummy, do you say 'It is me,' or 'It is I'?"

"Always remember the rhyme: 'It is I,' said the spider to the fly."

"But couldn't you say 'It is me,' said the spider to the flea?"

LONDON'S NEW SKY POLICE

Here we see Scotland Yard's autogyro—a plane with a horizontal revolving propeller, which enables it to hover in the air—leaving Hanworth Aerodrome for a flight over London. This plane is to be used not only in connection with traffic control in London, but also for assisting the criminal investigation department in their pursuit of criminals.

TEETHING FEVER Relieved/

Mrs. Edward James' baby had two teeth when less than three months old. She writes: "He has 18 now and I can truthfully say that giving him Baby's Own Tablets while cutting his teeth kept him fit and well. Teething is a restless feverish time for babies but the little ones who are soothed and the fever relieved by Baby's sweet, safe Baby's Own Tablets. Very easy to take, no after effects. Price 25c every where.

Dr. Williams' **BABY'S OWN TABLETS**

WORLD HAPPENINGS BRIEFLY TOLD

Bound for England after six years as British high commissioner to Canada, Sir William Clark sailed from New York to Great Britain.

The British Columbia government will construct a new bridge across the Fraser river at New Westminster, Premier T. D. Pattullo has announced.

A new deal for soap-box orators was declared when Robert Moses, commissioner of New York parks, announced that nine city parks, in addition to traditional Union Square, will be available for open-air meetings.

The general business outlook in Great Britain has brightened since June, Sir Josiah Stamp, well-known British economist and a director of the Bank of England, declared before members of the Aberdeen Chamber of Commerce.

An Irish Free State army aeroplane with three occupants crashed in the garden of Judge Meredith's home at Dublin. Lieutenant Arthur Russell and Private Twomey were burned to death; Sergeant Canavan jumped clear of the wreckage but was seriously injured.

With a view to developing a market in Japan for British Columbia sheep, the government has made a trial shipment of Shropshires for breeding purposes, Premier T. D. Pattullo said. The shipment was made by the Helian Maru.

Film Stars' Handwriting Analysed

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

(Editor's Note: This article will be found especially interesting, dealing as it does with well-known film stars. What does YOUR handwriting tell? See the invitation following this article.)

A correspondent sends me samples of the writing of several well-known people, and asks me to analyse the writing for her. There is so much of interest in these analyses, that I am making them the subject of a special article.

Perhaps you have wondered why many men have been led into the different pursuits in which they have gained fame and fortune. It is immensely interesting to think of what might have been if different individuals had been born with traits of character that were entirely different from the real characteristics of their nature.

Men and women are born into this world with definite talents and abilities that they must learn in order to take full advantage of them. Some go through life and never learn their proper talents, while others find and develop them.

Ramon Novarro, the prominent film star, is particularly fortunate in finding his talent in making the driving force of his life. His writing shows, as well those who have seen his films, that he is a great dramatic actor—that he can interpret a role in a way that few people can even approach, but he has also another ability and another very outstanding talent with which he has won recognition—his ability in music. The rhythm and breaks in his handwriting show immediately to the handwriting analyst—a talent and appreciation of the musical arts.

As an operatic singer, Ramon Novarro has achieved fame that is not often given to a man. His talent in music is well-known, and is, perhaps, his first choice of expression.

He has still another characteristic, another ability. His writing shows an ability to use his hands in a creative way—perhaps in painting, sculpture, or some other means of expression. Few men are born with such pronounced artistic ability in so many lines—drama, music and the sculpture arts.

Take the handwriting of John Boles, another star. The dominant trait in his character is his self-reliance. This is the quality that makes him depend only on himself for anything that he wants done. He is not sure (quite the contrary) to his

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Wernet's Powder is the most largest seller and prescribed by leading dentists: it holds teeth so firmly—they are so comfortably—that all day long you forget you ever had false plates. Leave no colored, gummy paste—keeps mouth sanitary, breath pleasant—the best powder you can buy yet cost is small—any drugist.

many friends, but, at the same time, he looks to one man only to get it—and that man is himself.

John Boles could not be anything else if he desired—there is an independence of thought and action that will not allow him to think of help when he has a problem to face. He is close-mouthed about his personal affairs, and will usually have them solved before other people have heard about them. Decisive, quick thinking—a man of action—John Boles.

If you want a personal reading of what your own writing reveals, send a letter in your normal handwriting, and state your birthdate, with 10 cents coin, and a stamped (3c) addressed envelope. You will be surprised at the revelations of your character and talents. If you enclose more than one specimen for analysis, please enclose coin for each. Address: Lawrence Hibbert, Grapho-Analyst, c/o Winnipeg Newspaper Union, 135 McDermott Ave., E., Winnipeg. Replies will be mailed as soon as possible, but please allow at least two weeks for reply.

Gold Strike

Find Of Great Importance In Northern Saskatchewan

Strike of gold on the shores of Lake Athabasca, in north-western Saskatchewan is a discovery of major importance, according to Hon. T. C. Davis, K.C.

Mr. Davis returned from Edmonton recently, where he met several prospectors just back from Lake Athabasca. Reports were favorable to the gold find, he said.

The strike lies 60 miles east of the Alberta boundary in Saskatchewan, and is easily accessible by water, since the quartz lies right on the lake shore. It is estimated that \$150 have been reported.

Fat which has become slightly tainted, or fat that has been used for deep frying, may be clarified and rendered sweet again by boiling it with a few slices of raw potato.

SUNDAY SCHOOL LESSON

SEPTEMBER 23

ISAIAH COUNSELS RULERS

Golden text: "Thou wilt keep him in perfect peace, whose mind is stayed on thee; because he trusted in thee." Isaiah 26:3.

Lesson: Isaiah, Chapters 7, 31, 38 and 37.

Devotional Reading: Psalm 21:1-7.

Explanations and Comments

Trust not in Egypt, but in Jehovah, 31:1-3. When Isaiah tells about his call to be a prophet, in the sixth chapter, he begins by saying, "In the year that King Uzziah died, I saw also the Lord." Others saw only the dying king; Isaiah always saw through events to God who is back of them. The rulers of Judah realize that there is imminent peril of Jerusalem's being taken by the Assyrians, but they give no thought of God. Isaiah pronounces we upon them for going down to Egypt for help, relying upon the horses, chariots and horsemen of that country in the hour of their peril, and failing to seek the help of Jehovah. Jehovah, too, is wise, the prophet proclaims (he speaks satirically), and he will bring calamity upon the evildoers.

The Egyptians are men, not God, as the great men of Judah seem to think; Jehovah is fresh, new, and ever new. Jehovah acts, both helper and helped will fail and be destroyed together.

"This satire was the shaft best fitted to pierce the folly of the rulers of Judah," Dr. George Adam Smith comments. "Wisdom, a reasonable plan for their times and prudence in carrying it out, was the last thing they thought of associating with God, and they were resigned to what they called their religion—their temples, worship, and poetry."

Call to Repent, 31:6-9. Turn ye unto him from whom ye have deeply revolted, O children of Israel; put away your idols. It is the duty of nations as well as men to own their dependence on the overruling power of God, to confess their sins and transgressions in humble sorrow, yet with assured hope that genuine repentance will lead to pardon and to recognize the sublime truth announced in the Holy Scriptures and proven by all facts of human history: that those nations only are blessed whose God is the Lord." (Lincoln).

Isaiah to Jehovah and your foe, the Assyrians, shall fall, not by the sword of man, but by the stroke of God. In the great crisis of history, the reason by Sennacherib, Judah was saved, as England was saved from the Armada, neither by strength of her bulwarks, for they had been burst, nor by the valor of her men, for the heart had gone from them, but because, apart from human help, God himself crushed her insolent foes in the moment of their triumph."

Little Journeys In Science

ATMOSPHERIC PHENOMENA

(By Gordon H. Guest, M.A.)

Dust, commonly associated with the gritty particles which fill the air in the course of "dust storms," is in reality responsible for some of the greatest beauties in nature. Blue skies, purple twilight and rain drops are caused by small dust particles which fill the air. Day would be almost as black as night, scientists say, if it were not that the particles of dust break up all the components of white light except the blue which we see in the sky. Sunset, with its richly-colored clouds, is the result of dust particles blotting out all the seven colors which combine to make white light, except those we see reflected in the sky. Twilight is the reflection of the slanting sunlight from particles of dust high in the air.

To dust, too, is due the rain and snow fall. Moisture in the clouds forms into drops or flakes by clinging around the small dust particles suspended in the air. Rain clouds usually travel about a mile above the earth.

The "ring around the moon" which is a common phenomenon in cold weather, is caused by ice crystals in the air. The crystals break up the moon's light and scatter some of the colors, reflecting others, and giving the familiar effect. "Sun dogs" across the sky are produced in this same way.

Sun spots activities projected on the atmosphere, are responsible for two other common spectacles in the sky, the aurora borealis and the rainbow. Contrary to popular belief, the rainbow forms a full circle in the sky, and not the arc with which we are familiar. Could man see high enough into the air he would perceive the rainbow in its entirety. This has been accomplished by airmen in recent years.

Stay On The

It seems difficult, sometimes, to stay on the Gold Standard, but the "rolled" standard—all that's something else again. Once a man has "rolled his own" with Ogden's Fine Cut he's on this "Rolled" standard of smoking enjoyment for life.

Ogden's is might easy to roll and it does give a smoother, cooler and more fragrant smoke. . . . To try Ogden's is to like Ogden's—particularly if you use "Chantecler" or "Vogue" Cigarette Papers. Ogden's Fine Cut and either of these makes of cigarette papers assure you a standard of satisfaction that's well worth staying on.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

P.S.—At any Poken Hand Premium Store, or by mail, you can get a large booklet of "Vogues" or "Chantecler" cigarette papers in exchange for one complete set of Poken Hands.

Your Pipe Knows Ogden's Cut Plus

Now You Tell One

Old Sol is "mother" to two chicks at Jonesboro, Arkansas. After Biddy had quit her nest in a field with only a few of her eggs hatched, Old Sol beamed down on the nest and two weeks later two more chicks broke through the shells. The sun-hatched chicks are quite normal and healthy, Mrs. W. D. Cobb, owner of the strange brood, said.

SUNDAY SCHOOL

By JACK MINER, Canadian Naturalist

"The little boys that I worked with in Sunday School twenty-five years ago are to-day the live wires of our church executive. In other words the Sunday School boys of to-day are the foundation of to-morrow's Church and Christianity. And without some form of way of introducing our children to Jesus and His ways our Church and Christianity would be bound to go down, and if we allow our established Christianity to go down we lose the very soul of the most prosperous and looked-up to continent on the earth to-day. We

could be no underprivileged, handicapped, uneducated, man rise up and have his grey hairs respected by all classes of people more than I have in the last twenty years. It all started when my little seven-year-old boy took me by the hand and led me to the way of the Sunday School over thirty years ago. Remember, Sunday School and Christianity are the foundation of our public schools and all other good things that follow. The best public school teachers I have known, producing the best results in the public schools, were, in

GAME PRESERVE

Jack Miner's Influence.—The photo shows a sign placed by a lake in British Columbia on Vancouver Island, which is 5,000 miles more or less from Jack Miner's home.

will die as other nations have whenever we ignore the blessed privilege that our loving Saviour died and died that we may live.

Moreover, I wish to say that I know no better or more permanent way that a young man can develop a smiling countenance and Christian courage and loyalty in his own heart than by teaching a class of boys in Sunday School. In other words the more we invest in the Sunday School the greater our daily income of blessing is.

Personally I have nothing to boast of, but all to thank God for, as there

every case, Christian Sunday School teachers.

My public school education was extremely good, but through the Sunday School, and it alone, I am now able to read and write and am now writing my third book. As far as education is concerned, the same can be said of my father, who never went to public school one day in his life, but his Sunday School teacher taught him to read.

Thus I have just reason to bow down and thank God for the Sunday School and its influence.

ADVOCATE STEPS TO FACILITATE TRADE WITH U.S.

Winnipeg.—Early action by the governments of Canada and the United States toward reciprocal trade concessions was urged by the ninth annual convention of the Canadian Chamber of Commerce here.

Support of reciprocity came as the convention adopted the annual report of the policy committee, which also urged a trade mission to China in 1935 to stimulate Canadian trade in the Orient.

Economy in government and a national unemployed relief policy with the Dominion contributing equitably on a basis of provincial needs also were approved. Administration of relief should be under provincial departments or commissions.

Land settlement as a step toward solving unemployment was advocated. The convention also recommended a Canadian wheat institute to stimulate marketing and use of Canadian wheat in markets of the world and co-operation between federal and provincial governments for protection of the public in sale of securities.

The convention approved steps taken by various federal governments to negotiate trade agreements that would secure concessions for agricultural products in new markets, and urged that every advantage be taken of every possible opportunity to extend this principle.

Appointment of committees by the incoming national council to study the problem of immigration and another to deal with upset social conditions and allied problems was decided. Duplicitary taxation was condemned and steps toward elimination asked.

"This chamber approves the report presented by the joint international committee and the conclusions reached by it at its meetings," declared the policy section dealing with the reciprocity question.

"It notes that on June 12, 1924, the president of the United States was granted by congress authority to enter into foreign trade agreements and to modify existing agreements. It expresses the opinion the governments of Canada and the United States should enter into negotiations at the earliest possible date to determine the extent to which mutual concessions can be arrived at with a view to accelerating the movement of trade between the two countries.

Immediate removal of duplicative taxation and steps to cut costs of government in the federal, provincial and municipal field were written into the policy report as a result of previous action of the convention. It asked reduction of membership in the federal cabinet, house of commons, senate and provincial legislatures. End of duplication and overlapping of government services such as administration of insurance, company law, agricultural and health and social services, was advocated.

Wants Money Back

Has Unused Railway Ticket Purchased in 1970

Chicago.—John Watt isn't going to take that train ride he bought a ticket for 1870—so he wants his money back.

The Chicago office of the Canadian National-Grand Trunk Railway reported that Watt, who lives at Auburndale, Mass., bought the ticket in Chicago for passage between Detroit and Boston.

Watt presented the ticket and it was forwarded to the general offices in Montreal, with the request for his money back.

The ticket, Watt said he was told, was good "until used."

Sir George Perley

Ottawa.—Born in Lebanon, N.H., on September 12, 1857, Sir George Perley is celebrating his 77th birthday. He first entered the House of Commons as member for Argenteuil in 1904 after two defeats, in 1900 for Russell and in 1902 in a by-election in Argenteuil.

W. N. U. 2064

Deplores Intrigue

De Valera Of Irish Free State Refers To Russia And League

Geneva.—Small nations raised their voices as the League of Nations assembly opened general discussion—Austria in fervent declaration and the Irish Free State in fervent protest.

Chancellor Kurt Schuschnigg, rigidly guarded by secret service men, stated Austria's case, reiterating Austria's insistence on independence.

Long, Jean Edmond de Valera, president of the Irish Free State, followed Schuschnigg and somewhat heatedly declared he did not object to Russia's entry into the league, but he did object, vigorously, to the backstairs intrigue going on over the wording of the invitation to Russia. De Valera demanded the whole matter be put before the league assembly.

Schuschnigg stressed his words as he declared the intention of his government to preserve Austria's internal and external independence. He denied the Austrian government was reactionary. "We are not reactionaries," he said, "but sufficiently realists to dispense with a backward glance at the policy of an earlier day."

Mr. de Valera said flatly that he didn't like the lobbying that has been conducted to secure Russia's entry. He objected to the "hotel-room intrigues," the drafting and re-drafting of the form of invitation.

He was ready to vote for Russia's entry, he said, although the ideals of the Free State and of the Soviet were poles apart. From inquiries he has made he gathered that Russia would have the necessary two-thirds majority vote to enter the assembly, and that Russia was ready to join.

"Then why not get down to business at once, and bring the matter before the assembly without attempting to deprive any state of its right under the convention to object to Russian membership," he demanded.

Chinese Demand Food

Inland Province Faces Famine After Summer-Long Drouth

Nanking, China.—The wet grows loud and louder in famine-stricken Anhwei province.

A summer-long drouth that has seared fields, dried water sources and made desolate that thickly-populated countryside gave no sign of ending, and hungry desperate farmers swarmed into smaller towns demanding food from rice shops. These closed, fearing attacks.

Advices from the inland province where the rigors of the winter are as great as those of summer—indicated relief must be forthcoming promptly if widespread disorders and banditry are to be averted.

There were grim stories of hunger-crazed wolves sweeping down on helpless villagers, farmers using their last small supplies of drinking water in fruitless efforts to save parched crops, peasants dying everywhere of hunger, disease and polluted water supplies.

Will Enforce Bird Act

R.C.M.P. Official Issues Orders To Arctic And Sub-Arctic Posts

Montreal.—Instructions were sent out at the closing session of the International Association of Game, Fish and Conservation here by Colonel J. W. Spalding, deputy commissioner of the Royal Canadian Mounted Police, to officers of the force in 140 Arctic and sub-Arctic posts to see that the Migratory Birds Act was obeyed by white men and Eskimos. He stated if there were a like decrease in the number of migratory birds in the next 30 years as there had been during a like period in the past, Canadians of the future would never see wild geese or ducks.

James Brown, of Montpelier, Vt., was chosen president. John Farley, of San Francisco, was elected first vice-president.

Nickel Production

Ottawa.—A huge increase was shown in the production of nickel for the six months ending June, when it amounted to 65,533,586 pounds as against 22,760,991 pounds for the corresponding period of 1933, the Dominion bureau of statistics reported.

BANK GOVERNOR

Graham Ford Towers, assistant to the General Manager of the Royal Bank of Canada, and one of the youngest of the Dominion's high banking officials, who has been appointed Governor of Canada's new Central Bank.

Cargo For Churchill

Livestock Pool And Wheat Pool To Forward Shipments On S.S. Brandon

Saskatoon, Sask.—Co-operatives will play the chief part in furnishing cargo for the second voyage of the S.S. Brandon from Churchill this year. The Saskatchewan Livestock Pool will furnish all the cattle, sending 250 head to the Co-operative Wholesale Society of England. In the hold will go a cargo of wheat from the Saskatchewan wheat pool, which may have the same destination.

The Brandon will leave for London or Birkenhead during the latter part of September. J. C. Hackney, manager of the livestock pool, said the pool will try to make the cattle shipment representative consignment from northern Saskatchewan, from as many producers as possible who can supply first class quality. It is expected that they will be drawn chiefly from the Prince Albert area.

Stronghold Of Peace

Adolf Hitler Pledges Germany To Peaceful Measures

Berlin.—Adolf Hitler again solemnly dedicated Germany to the cause of peace. The reichsfuehrer received the diplomatic corps in the reichs-president's office, last occupied by the late Paul von Hindenburg, and told the assembled envoys:

"The unalterable goal of my policy is to make Germany the stronghold of peace."

Indians Claim Rights

Mistawans Tribe Alleges Band's Funds Improperly Spent

Prince Albert, Sask.—Aged Chief George Draever, 78-year-old head of the Mistawans Indians, testified in the exchequer court hearing of the band's petition of right here that in speeches made at the signing of the treaty in 1876, commissioners of Queen Victoria promised that medicine would be supplied free to the Indians on their reserve located west of here.

In their petition the Indians allege that the department of Indian affairs improperly spent \$21,275 of the band's funds. Medicine and education, which they claim were to be free, were charged against funds held in trust by the government for the band. Other expenditures for farm instructors' salaries, education and maintenance of deaf and dumb members of the band, overcharges for 20 head of horses and payment of treaty money to two women not members of the band were improper and without sanction, it is alleged.

Electric Lights In North

Mission Hospital Generates Its Own Electricity

Ottawa.—Encountering severe gales, ice, rain and fog, the steamer Naoscope, carrying the 1934 department of interior's expedition to the posts in the Canadian Arctic archipelago, continues to make progress on this season's patrol.

A highlight of the visit to Pangnirtung was the installation in the Anglican mission hospital of a plant for the generation of electricity, a donation by the family of the late Sir Edward Kemp, Toronto. The hospital was ablaze with light before the steamer left to proceed northward.

Would Stop Hasty Strikes

Chicago.—Action aimed at preventing hasty calling of printers' strikes was taken by the International Typographical Union, in convention here, delegates voted to change the union rule which required a strike vote of local members within 24 hours of its authorization by the executive council of the international, to allow the council discretion in fixing the time for a vote.

Germany Offers To Pay

London.—German importers of yarn, facing a complete shutdown of the source of supply, have offered to pay £250,000 owing to Lancashire cotton companies in 12 monthly instalments, it was announced. In the offer, it was declared essential that delivery of yarn to Germany recommence immediately.

TELL OF HUGE PROFITS FROM WAR MUNITIONS

Washington.—The vast Du Pont Corporation of Delaware was shown before United States senate munitions investigators to have done a war order business totalling \$1,245,000,000 between 1914 and 1918—part of the profits from which went into General Motors' stock.

Pierre Du Pont, member of the munitions manufacturing family told investigators that \$47,000,000 of the corporation profits were spent to buy one-fourth of the common stock of General Motors.

Three brothers—Innes Du Pont, Pierre S. Du Pont and Lamont Du Pont—and their cousin Felix Du Pont, were in the room.

The testimony brought out that Du Pont was the first United States company to receive great war orders. In the first year of the war, from September, 1914, to September, 1915, it received \$265,000,000 worth of war orders from Europe. In all of 1915 orders totalled \$323,000,000. During the year before the war the company's business amounted to only \$36,000,000.

The end of the war brought a cancellation of \$260,000,000 in contracts held by the Du Pont Company.

"The war's end meant a great change for us," said Pierre "a great change."

A report said the company showed a net loss of \$10,601,000 in 1919.

Appeal For Unemployed

Legion Head Suggests Plan To Help Them Keep Confidence

Calgary.—A plea to all Canadians that efforts be made to prevent unemployed persons from losing confidence in themselves, their country and beliefs, was made here by Brig-Gen. Alex. Ross, president of the Canadian Legion.

"It is only by proper application of sympathy and understanding we shall be able to help them back to normal life," declared General Ross, "and I can suggest no work more appealing to service clubs than the task of rebuilding these men into normal, healthy citizens."

The Canadian Legion, General Ross intimated, was studying a plan that would provide vocational and physical training for returned men out of work.

Export Of Feed

Would Withhold Shipments To The United States

Wells, Man.—Reverses of 12 municipalities in southeastern Manitoba petitioned the Manitoba government to withhold export licences for feed into the United States until the needs of dried-out areas in the province are fully met.

It was estimated 32,100 tons of fodder will be required for livestock quartered in the southwest this winter. Practically no grain was threatened over a wide area.

Big Ben Is Burnished

Historical London Clock Has New Coat Of Paint

London.—Big Ben has had his faces washed and all dored up with crimson paint and bright gold.

A drab and gloomy landmark when it was put in splints for overhauling, Big Ben reappeared in the same glittering finery as it did in the early sixties.

The gold is real gold, too, applied in the form of the thinnest of gold leaf.

Receives Appointment

Winnipeg.—Appointment of W. A. Mather, formerly assistant to the vice-president in Montreal, to be general manager of Western lines of the Canadian Pacific Railway was announced here by W. N. Neill, vice-president of Western lines. Mr. Neill also announced appointment of C. A. Cotterell, general superintendent of the British Columbia district, to the post of assistant general manager in charge of the British Columbia region including Vancouver Island.

MOTOR MAGNATE PREFERS BICYCLE

Recently Lord Nuffield (formerly Sir William Morris), famous British automobile magnate, stated that the best days of his life were spent on a bicycle and that for health and pleasure he still preferred to tour the country by that means. As a sequel to that statement the British Cycle and Motor-Cycle Manufacturers and Traders Union sent a deputation to Lord Nuffield's home at Cowley and presented him with a new bicycle. This picture shows the happy peer riding his new steed.

Shares in the Bank of Canada

Shares of the Bank of Canada to the amount of \$5,000,000 are offered for public subscription by Honourable Edgar N. Rhodes, Minister of Finance. The shares are of \$50.00 each and are offered at par. Not more than 50 shares may be held by any one person and only persons who are British subjects ordinarily resident in Canada or Canadian corporations controlled in Canada, may own stock. These provisions will insure a widespread interest in all parts of Canada in the sale of the stock of an institution to which Parliament has entrusted wide powers and responsibilities affecting the financial and economic welfare of Canada.

The Bank is authorized to pay cumulative dividends from its profits, after provision for expenses, depreciation, etc., at the rate of 4 per cent per annum, payable half-yearly, which is considered to be an attractive return in comparison with ruling interest rates on high-grade securities. Surplus profits are to be applied to the rest fund of the Bank or paid into the Consolidated Revenue Fund as provided by the Bank of Canada Act.

The subscription list will open on Sept. 17 and close on or before Sept. 21. Shares are being offered simultaneously in every part of Canada, and consideration will be given all applications posted not later than midnight on the day on which the list is closed.

Subscriptions are to be mailed direct to the Minister of Finance, Ottawa, and must be accompanied by an initial payment of \$12.50 for each share and by a statutory declaration which forms part of the application form, evidencing the eligibility of the applicant to become a shareholder. The balance of the subscription price, \$37.50 a share, is payable Jan. 2, 1935.

Official prospectus and application forms are obtainable at postoffices, banks and other financial institutions.

One of the important functions of the shareholders is the election of 7 directors who, with the Governor and Deputy Gov. of the Bank, form the Board of Directors who will supervise and control the conduct of the business of the Bank.

In the bylaws of the Bank provision is made for nomination of directors by shareholders. For the convenience of those who cannot attend meetings, provision is made for the registration of their votes.

One of the first steps to be taken in the organization of the Bank, after the stock has been subscribed, will be the nomination and election by shareholders of the first Board of Directors.

THESE TRAVELLERS VISIT MANY DISTRICTS

Mr Henry Trapp took a motor party, over the weekend, down thru Wetaskiwin, Red Deer, Airdrie, Calgary, Bassano, Big Valley, Nevis, Stettler, Hallikirk, Cassio, Dried Meat Lake, Camrose, Alliance, Watergreen, Wattleford and Winterburn. If the weather had been favorable, the trip would have been extended. Hen says ducks appeared to be scarce in the districts thru which he traveled.

Hen's next trip will come a little later on, when he "goes out West" after beavers and deers.

Ducks Are Flying High.

According to reports received, not so great a damage as anticipated was performed on the duck population hereabouts, since the season opened on Saturday last.

Despite the unfavorable aspect of the weather on Saturday, the united parties set out from town, armed to the wishbone with repeaters and their favorite brand of shells, determined to get their quota—15 for the day. The game commissioner was very considerate in this respect, in allowing the shooter to take 15 in only half a legal day. After Oct. 1 the daily bag limit is raised to 25.

The migration of the feathered beauties from the North was not as heavy as at this time in former year; and the locally-raised birds were gunshy, having probably been molested in the pre-shooting period.

The Mail Schedule.

From the East and to West—
Tues., Thurs. and Sun., at 10:37 P.M.

From the West and to East—
Mon., Thurs. and Sat. at 4:51 a.m.
Mail for East will also be dispatched to west bound train and transferred east at Jasper.

Open Seasons* for Game.

Fox, Nov. 1—Jan. 31
Mink, martin, otter, Nov. 1—March 31
Muskrat, March 1—April 30

BYLAW No. 10.

The Council of the Municipal District of Inga No. 620, duly assembled, enacts as follows:

1—Any person committing a breach of any of the provisions of any of the Bylaws of the Municipal District of Inga No. 620, now in force, or which may hereafter come into force, shall on summary conviction thereof before a Police Magistrate or Justice of the Peace, forfeit and pay (except where other provision is specifically made therefor) a penalty not exceeding \$100.00 in addition to the costs of the conviction for such offence.

2—In default of immediate payment of any fine or penalty herein provided or specifically provided in any other bylaw or any penalty and license fee, where provision therefor is specifically made, and of the costs of conviction or of such penalty, license fee or costs, as the case may be, imposed by the convicting Justice, the same shall be recovered and enforced as by bylaw provided. DONE AND PASSED IN Council this 22nd day of May, 1934.

Certified to be a true copy of Bylaw No. 10.
Signed, R. G. HOWAT, Reeve.
Signed, JOSEPH BERT, Sec.-Treas.

OPEN-AIR CONCERTS ON SATURDAY EVEG.

The town was well supplied with outdoor musical entertainment Saturday evening; two bands operating at the same time, on adjoining corners. The Seventh Day Adventists, with their band, was one of these; the Salvation Army band was the other outfit. The Glory Hills band was unable to attend.

On Sunday morning the town was visited by a detachment from the Watchtower Bible & Tract Society (formerly the I. H. S. A.)

Christian Science.

At all Christian Science Churches next Sunday, the subject of the Lesson-Sermon will be "Matter." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "In God I will praise His word, in God I have put my trust, I will not fear what flesh can do unto me" (Psalms 56:4). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 228): "If we follow the commands of our Master, 'Take no thought for your life,' we shall never depend on bodily conditions, structure, or economy, but we shall be masters of the body, dictate its terms, and form and control it with Truth."

RUSSIAN WHEAT SITUATION

(Annual Average Wheat Production 800 Million Bushels)
It is estimated that since 1916 the population in Russia has increased by at least 25 million persons, which means that Russia's annual requirements of wheat are at least 125 million bushels per annum. 1916 is not accurately known, but it can be said with fair accuracy that the average annual production for the past two or three years has been very little, if any, greater than it was before the War in 1913 and is now producing for the use of her own people. Russia, therefore, should not be, on the average, a serious competitor in world wheat markets.

THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Coronado Trail," "The Canyon Trail," Etc.

CHAPTER I.

"When you tell me that you're going out to Crevasse County to claim your half of the old Hour-glass ranch, I tell you, Mr. Keene, that you're just asking for trouble," Simon Burwell, first vice-president of the Drovers Bank in Cato, leaned back in his chair, spread his hands tip-to-tip and stared at his visitor. He took him in from head to foot and frankly liked what he saw. Then he studied an uncle near by on his desk.

"Your uncle was a good friend of mine," he said. "But he was very careless or unwise to make the will he did."

"What do you mean?" Gerald Keene straightened up in his chair and Simon Burwell grinned at him.

"Don't carry a chip on your shoulder, my boy. I'm not criticizing old Peter. Why, boy, I loved him. Your uncle lived many years in the West. He and old Joe Carr were partners for years. It was quite natural that when Peter died he should leave the Hour-glass ranch to his partner, Joe Carr. But when he dragged you in to the matter he only complicated matters. How long since you saw your uncle?"

"I never laid eyes on him in my life," said Keene. "He was my mother's brother and the family was widely separated. I happened to learn of the bequest quite accidentally. He had been . . . in business . . . in the Northwest and I happened to drop in at my old home. There I learned about the will so I got the letter from Judge Frame to you to identify myself. The old judge told me that you have always handled the ranch's business. That's so, isn't it, sir?"

"It has never kept me busy, I'm sorry to say," said Burwell. "There is no business worthy speaking of. You're the half owner of a big ranch that doesn't pay a dollar of dividends . . . and won't. Have you seen your uncle's will?"

Burwell did not wait a reply. He went to a wall safe and came back with a slim document that he read meticulously, accenting every word.

"You see, he left the Hour-glass equally to you and old Joe Carr and he provided that, in case either should die, the entire property passes to the other. It's a queer sort of way to devise property. For more'n ten years old Joe Carr has tried to make a good thing of the place but each year he's only got deeper in the red."

"What ails him? Doesn't he know his business?"

"Oh, he knows his business all right. There's not a better cattle-man south of the Palladases. . . . You may as well know the worst at once, Mr. Keene. . . . Old Joe drinks quite a bit. He didn't always, but he does now. I think that's one reason for his failure to make the Hour-glass pay. He has lived there for years with his daughter. He has an excellent manager in Frank Crew, but . . . Now, mind you, this is absolutely under your knife, and I believe, though to save my soul I couldn't prove it, that the Hour-glass has been for years, and is being right now, very thoroughly and consistently looted."

"Huh!" Gerald Keene's gray eyes half closed and Simon Burwell noted vaguely that they were shot with oblong hazel sparks. "You've said either a lot too much or too little," Mr. Burwell. Go on, please."

"And he hitched closer to the desk as Burwell lowered his voice. "Well. . . . It began about five or six years ago when two men, Sam Dustin and Spike Goddard, bought a lot of scrip that they picked up and put up a ranch house. They called the place the Broken Spur and it was mostly given over to raisin' under-bred stock. They didn't have to buy good stock with old Joe Carr's blooded Hereford bulls on the open range."

"All I really know is that bad spirit devils between the two spreads. I don't know what started, but I do know that over a year ago Jim Giron, sheriff of Crevasse County, notified both ranches to pay off their men on different days. That was because every pay day in Cato was a regular Civil War. Anyhow . . . old Carr claims, somewhat loudly, that Dustin and Goddard have been looting the Hour-glass, but he's never been able to prove it. All I really know is that, with cattle and deer and land and grass, old Joe is getting deeper and deeper in bad water. That's all I can tell you; that you're half-owner in a big ranch and that, if you're not mighty careful, you'll have your head pulled under."

"Huh. Still I don't quite see. If old man Carr is losing money, who pays it out? Where's it coming from?"

"I've tried to tell you. God help you if you try to keep old Joe Carr's head above water. He'll only drown you both. But you'd better run out there yourself, Mr. Keene, and take a look at things."

"Thanks. I'm going to do exactly that."

As Gerald Keene rose and took his hat, Simon Burwell got a glimpse of gray eyes that narrowed in the glare and of a mouth that was almost straight above a full lower lip. The knowing vice-president grinned a little.

"I think my visitor will go far," he muttered. "I never even asked him what his occupation is."

"Huh. A man used to selling bonds'll not learn much about a ranch. However . . . Old Judge Frame evidently takes an interest in him. I swear I'm well out of the business." But he rose and walked to the long window and watched his late caller as he left.

A half-hour later Gerald Keene plunged through the door of a hotel room, slammed the door and gripped the shoulder of a man who was sitting in a chair by the window watching the world spin past between the toes of his boots on the sill.

"Duro," he said, "we're in a mess right up to our hocks. I swear I don't see any answer to it."

"His face lit and his eyes twinkled. There are eyes that gleam and eyes that twinkle. These twinkled. There is a difference. One has humor; the other has none. Stone studied his friend for a brief moment.

"Shoot," he said.

"Well, I gave old man Burwell my letter of introduction and he told me all he knew about the Hour-glass ranch. It seems that by my uncle's will half the ranch is mine; the other half belongs to his old partner, Joe Carr. He lives on the Hour-glass with his daughter and has made a flat failure of it. If either of us dies, the other gets the entire ranch. . . . "Very little; only that he was a lovable old fellow and that he was mightily fond of Carr. Oh! He told me, too, that two men, Dustin and Goddard, in the past few years have bought up a lot of 'scrip' and started

a ranch next to the Hour-glass. They call it the Broken Spur. Burwell says old man Carr drinks a bit and is convinced that Dustin and Goddard have been systematically looting the Hour-glass for years. Too bad about old man Carr's drinkin', isn't it?"

"It sure is. You can reform anybody but a systematic drinker. Go on."

"That's all. Burwell said there's a regular feud between the two ranches that reached the status of a Civil War on pay-days. I reckon old man Carr's been shootin' off his mouth too much after a drinkin' spell. You know how it is. They say a lot more'n they ever started to say. Could you find out anything?"

"A little. While you were over at the bank I hunted up a man I know. You see, I used to work for the Lazy M in Nebraska. They were a member of the Stock-raisers Association and that's a lucky bet in a cattle country. Just because Nebraska went crazy over Prohibition's no reason her people shouldn't be sane in spots. Old Ben Lyon, who used to be their attorney, is practicing here now. I saw his shingle. I went to see him while you were with Burwell."

"Well . . . go on."

Stone thoughtfully rolled a cigarette and went on as though talking to himself.

"Ben says he's known Joe Carr since he was a pup. He says that drunk or sober, old Carr is as straight as a lariat but that for some years he's been up against hard luck. Just plain up against it. About three years ago a pony slammed him against a bush-post in a corner and busted him out of his right leg. That's when he began to drink, I reckon. It busted him up a good deal. Not enough to keep him from ridin', but enough to make him a poor bet on a man that needs two good eyes. He's got a fine manager in one Frank Crew, but they just can't make both ends meet."

(To Be Continued)

THE RHYMING OPTIMIST

By Aline Michaelis

LURES

Life would defeat us as we go by
Yet, can she cheat us, though she may try?

Though she forget the promises made,
Think, can we yet be wholly betrayed?

For all her scolding,
Doesn't she bright gleams,
In Youth's glad morning,
She gets fair dreams.

She gave us laughter
And love's sweet cheer;
Then what comes after
We need not fear.

Though youth must perish
This boon endures;
Brave hearts still cherish
Bright, bygone lures.

Infantile Paralysis Vaccine

Canadian Research Worker Has Developed Vaccine For Dread Disease

Discovery of an apparently effective infantile paralysis vaccine was explained to 3,000 delegates and lay members at the closing session of the American Public Health Association convention.

Dr. Maurice Brodie, young Canadian research leader formerly of Ottawa, Ont., now connected with the New York City health department, described recent experiments with the poliomyelitis vaccine which apparently has proved successful on a group of human volunteers, including Dr. William H. Park, head of the New York City health department research laboratories, Dr. Josephine Mead, Dr. Brodie himself and number of children.

The Alberta honey crop of 1933 was almost twice as large as that of 1932 and was readily marketed at increased prices. As a result, owners of commercial apiaries in the southern part of the province report a fairly satisfactory year.

"What became of that bill the store sent us?"
"Oh, I sent it back marked insufficient funds."

"I CAN'T AFFORD TO RISK FAILURES DUE TO INFERIOR BAKING POWDER. THAT'S WHY I INSIST ON MAGIC. IT'S ECONOMICAL, TOO—LESS THAN 1/2 WORTH MAKES A BIG CAKE!"

says Miss M. MCFARLANE, Distiction of St. Michael's Hospital, Toronto

MAGIC Baking Powder costs so little—and can always be depended on to give you uniformly good results. It actually takes less than 1/2 worth of Magic to make a big three-layer cake. So why take chances with inferior brands? Always bake with Magic and be sure!

MAGIC
MADE IN CANADA

"CONTAINS NO ALUM." This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredients.

Requires Drastic Action

Only Way To Solve Problem Of

Highways' Peril

In Great Britain they put on a "safety-on-the-highways week." The result was that in that particular week 126 persons were killed and 5,985 injured, the second highest casualty list for British highways on record.

The experience suggests that carelessness on the highways calls for something sterner than experiments in good precepts.

The cold truth is that the only way a certain type of driver can have it impressed upon him that he must drive carefully is through the medium of a stiff fine and in many cases the cancellation of his license.

One year of a most vigilant watch for traffic offenders, with the offenders dealt with ruthlessly, might do more to solve the highways peril problem than all that has been written and talked about it these past ten years.—Ottawa Journal.

A Banker's Passport

Carries Engraved Portrait Clipped From Ten Dollar Bill

All passports bear a photograph of the holder, but there is one properly authorized and issued to a Canadian without his photograph—it carries an engraved portrait clipped from a \$10 Bank of Montreal bill. The holder's name is Sir Frederick Williams-Taylor, a director and formerly general manager of the Bank of Montreal.

The circumstances under which Sir Frederick clipped the bill and attached the engraving to his passport application are not known, but this well known Canadian exercised the usual caution attributed to bankers by retaining the serial numbers in order that the bill might be replaced by a new note.—Financial Post.

Little Helps For This Week

"I have called upon Thee for Thou wilt hear me O God; incline Thine ear unto me and hear my speech." Psalm 16:1.

"Ye people pour out your heart before Him: God is a refuge for us." Psalm 42:8.

What/ere the care that breaks their rest,

What/ere the wish that swells thy breast;

Spread before God that wish,

that care,

And change anxiety to prayer.

Trouble and perplexity drive us to prayer, and prayer driveth away trouble and perplexity.

Whatever it is that presteth thee, go tell to thy Father, put the matter into His hand and so shalt thou be freed from the dividing, perplexing care the world is full of. When thou are either to do or suffer, anything go tell God about it, acquaint Him with it, yes burden Him with thy trouble, and thou hast done with caring. No more care, but quiet sweet diligence in thy duty and dependence on Him for the carrying of thy matters. Roll thyself and thy cares as one burden on thy God.—R. Leighton.

Bees As Messengers

German Beekeeper Finds Them

Better Than Carrier Pigeons

A German beekeeper has found new use for bees. They are no longer to be mere honey-gatherers and wax-builders, but messengers! He has written messages on scraps of paper and fastened them to the backs of bees. The bees have quickly brought them back to the hive, and never has a bee failed to deliver the goods. The beekeeper, Herr Bernhard Gubler, says bees are less likely than pigeons to fall into the wrong hands.

Way to Ease Headaches, Pain Almost Instantly

METHOD OFTEN RELIEVES NEURALGIA AND RHEUMATIC PAINS IN MINUTES!

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show Aspirin does not harm the heart.

Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH

An Aspirin tablet starts to disintegrate and go to work.

What happens in these three seconds? Aspirin starts "taking hold" of pain. A few minutes after taking.

When in Pain Remember These Pictures

—ASPIRIN DOES NOT HARM THE HEART—

BANK OF CANADA
CAPITAL \$5,000,000
Divided into 100,000 Shares of \$50.00 Each

The Minister of Finance, pursuant to the provisions of the Bank of Canada Act, offers for public subscription:

100,000 Shares of the Capital Stock of the
BANK OF CANADA

Issue Price: \$50.00 a Share

PAYABLE AS FOLLOWS:
On Application - \$12.50 a Share
On Jan. 2, 1935 - \$37.50 a Share

The Bank of Canada has been incorporated by the Parliament of Canada and given wide powers to operate as a central bank of issue and rediscount for Canada.

The Bank is authorized to pay cumulative dividends from its profits, after provision for expenses, depreciation, etc., at the rate of 4 1/2% per annum, payable half-yearly. Surplus profits are to be applied to the rest fund of the Bank or paid into the Consolidated Revenue Fund as provided by the Bank of Canada Act.

Not more than 50 shares may be held by or for the benefit of any one person. Shareholders must be British subjects ordinarily resident in Canada or corporations organized under Dominion or provincial laws and controlled by British subjects ordinarily resident in Canada.

Subscriptions should be mailed to the Minister of Finance, Ottawa, in envelopes marked "Bank of Canada Shares."

Payment must be made by a certified cheque on a chartered bank or by a bank draft or post office or express company money order, payable to the Receiver General of Canada.

As soon as possible after subscriptions have been received, allotments will be made and notice of the allotment will be mailed to the post office address furnished by the subscriber.

Further particulars will be found in the official prospectus and application form which may be obtained at the Department of Finance, the offices of the Assistant Receivers General, post offices, any branch of any chartered bank, and other financial institutions.

The Subscription List will open on September 17, 1934, and close on or before September 31, 1934, with or without notice, at the discretion of the Minister of Finance.

WHEAT SITUATION IN FRANCE

The average annual wheat production from 1920 to 1931 was 276 million bushels, and the average annual consumption during that period was 325 million bushels. France, therefore, imported approximately 50 million bushels per annum for her own use.

In 1932 and 1933, however, France, in common with most importing European countries, enjoyed very high yields to the acre, and averaged a production of 347 million bushels per annum and so built up a surplus during those two years of 40 million bushels, and did not need to import any net wheat for herself. Due to the high artificial price set by the government in France for wheat and bread, consumption during the last two years has substantially decreased, because bread has been more expensive than other foodstuffs which the housewife could purchase. The French wheat crop for this year is estimated to be 304 million bushels but after making up the deficiency for the decreased consumption, France will still have 33 million bushels available for export to other countries. The government intends to loan these exports.

CHARACTER ANALYSIS AND PSYCHOLOGY.

Stony Plain was honored this week by a visit of the well-known Dr W G Alexander, famous character analyst and vocational expert. The professor held forth at Kelly's hall, and gave his first address Tuesday Evng. The audience was not so large as might be desired, but those present listened intently to the speaker's remarks, which covered a variety of subjects.

At the close of the lecture several gentlemen were given character and vocational analyses, among these being Mr J Armbruster and Mr Henry Oppertsbauser.

The lectures will continue at Kelly's hall every evening up to and including Monday the 24th. A collection will be taken.

On Sunday next Dr Alexander will take for his subject at the evening session "Building a Personality."

To Sell the Surplus Grain.

A great improvement in the position of Alberta farmers is looked for, if J A Richardson, Winnipeg, grain man, proves correct in his forecast that Canada will find a ready market for surplus wheat this year. This gent declared recently that all of this year's crop will be sold without difficulty.

AN OATWAY AVE. RESIDENCE BURNS.

Friday Night's Blaze Consumes the Home of Edw. Briske.

About 11 40 o'clock Friday night the Chang-clang 1 of the fire bell awakened the slumbering villagers from their beauty sleep. On emerging from the coverlets, they were apprised of the fact that a fire was in progress on the Tony Rosenberger premises, on Oatway ave.

On arriving at the scene it was found the residence of Mr Edw. Briske was enveloped in flames. As the fire had made considerable headway on the building, the efforts of the fire fighters were turned to saving the adjoining buildings, and the firm succeeded in doing this. Two stacks of hay Mr Briske had near his barn were saved. The cottage was a new one, having been erected last Spring. The fire seems to have been caused thru the lack of a proper chimney. A small insurance policy was carried.

This seems to be an unlucky spot, as it was on this selfsame site, some seven years ago, that Mr Grokenberger built a cottage, and lost it the following year, thru a fire resulting from a defective flue.

Among those who attended at the scene of the blaze was former Mayor Donaldson. Mr Donaldson didn't get to the big fire on Main street last December, when his harness factory was endangered, but he succeeded in being among those present at Friday's conflagration, altho the latter occurred at a time beyond his usual hour for retiring.

'Maedchen In Uniform'

An Unusual Love Story,
—WITH—
Dorothea Wieck
and Hertha Thiele.

—AT—
**KELLY'S HALL
FRIDAY,
SEPTEMBER 28.**

"Maedchen in Uniform" is an outstanding achievement. It is the first film to come out of Europe with an entirely feminine cast. It was written and directed, too, by women. The Girls and Young Women in the cast, over one hundred of them, come from every part of Germany.

Admission, 30c and 15c.

**Dance After Show,
To Celebrate the Opening
of the New Hall.**
